

Important information about construction products regulation (CPR)

Important information about Construction Products Regulation (CPR)

The Construction Products Regulation (CPR) has replaced the Production Products Directive since July 1st. 2013. The declaration of conformity has been replaced by the declaration of performance (DoP). The DoP sets down the information that has to be declared for CE marking.

The DoP must relate to a product. In the following we would like to inform you how to find the required information to arcon coatings on our website.

Figure 1 shows exemplary the tag for our product „arcon N10“.

The red marked area refers to the arcon DoP number.

As shown in figure 1, „LE/DoP-Nr. 131304/CPR/2013-07-01“ refers to DoP of coating „arcon N10“ in combination with substrate float 4mm. The performance of the essential characteristics can be found in table form on our website.

If further information are required (e. g. DoP for differing coating – substrate - combination) it would be our pleasure to provide you the desired information. Please feel free to contact us at phone number +49 3641 28450.
